DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-12, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hammond.

The patent to Hammond shows a coating-liquid spray system containing a liquid atomizer 324 in the form of a rotary atomizing element to spray the coating liquid onto an object to be coated, characterized in that it comprises an accessory-liquid feed unit 30A fitted with a discharge 32A to meter the accessory liquid into the coating-liquid's spray jet being sprayed from discharge 32C (see Figures 3B-3D).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hammond.

The patent to Hammond discloses the instant invention except for the accessory-liquid feed unit being designed to drip the accessory liquid as recited. It would have been

Art Unit: 3752

obvious to one having ordinary skill in the art at the time the invention was made to have designed the accessory-liquid feed unit of Hammond to drip the accessory drip since such a modification would only require controlling the flow rate of the accessory liquid.

5. Claims 1-4, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hammond.

The patent to Hammond discloses the instant invention except for the method, however, since Hammond discloses all of the limitations of the instant apparatus, the apparatus of Hammond is capable of carrying out the method as recited. Regarding claim 7, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have designed the accessory-liquid feed unit of Hammond to drip the accessory drip since such a modification would only require controlling the flow rate of the accessory liquid.

Allowable Subject Matter

6. Claims 5, 8, 13, and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Liu, Tufts, and Fritz are pertinent to Applicant's invention.
